

YOUR COLD CHAIN. SOLVED.

End-to-end temperature control solutions for modern retail, FMCG, quick commerce & pharma supply chains.

Save Time

Cut operational hours, not corners

Total Certainty

Guaranteed temperature, every trip

Your Edge

Fresher product, lower cost

Sound familiar?

Nearly all operation managers in perishable industries face these every single day.

*We've heard it all.
We've solved it all.*

Products reaching stores warm, spoilage, waste, complaints

Reefer trucks eating your budget but breaking down anyway

No temperature backup during power cuts putting entire inventory at risk

Last-mile cold delivery is expensive, unreliable & unscalable

Ops costs climbing while margins keep shrinking

WE KNOW YOUR WORLD.

And we know how hard it is to keep it cold.

67 Million Tons

of produce wasted annually in India

Farmers forced to sell under distress. Products spoiling mid-transit. You're managing breakages, complaints & refunds but not growth.

50%+ Samples

retail-stored meat infested with Salmonella

Temperature breaks in the chain are not only costly but also a liability. One incident can undo years of customer trust overnight.

Reefer Trucks?

Expensive. Fuel-dependent. Inflexible.

You need coverage for last-mile, mid-mile and storage. Not one-size-fits-all solution that breaks at every handoff. Your operations deserve better.

You didn't get into this business to manage spoilage. Neither did we.

Your trusted cold chain partner. End-to-end.

We combine proprietary temperature-control technology with deep business operations expertise to deliver a solution that actually fits your operations. Not the other way around.

What Makes Us Different

Proprietary Technology

In-house R&D across temperature ranges from -75°C to $+89^{\circ}\text{C}$. Built for Indian conditions.

Ops Consulting Built In

We don't simply sell you a box. We analyse your route, duration, and load. Then prescribe the exact solution.

Sustainable by Design

Reusable PCM solutions. Meet your ESG goals while cutting costs.

Savings & Convenience

No Technical Expertise needed. Operational Costs reduced by 40% or more.

THE TECHNOLOGY BEHIND YOUR FRESHNESS

No engineers needed. Here's how it works in plain English.

PCM = Phase Change Material

Think of it as a thermal battery.

- ✓ Absorbs and releases heat at a precise, constant temperature
- ✓ Saves up to 10x more energy consumption than regular ice
- ✓ Reusable thousands of times: freeze it, use it, repeat
- ✓ Works passively. No power needed in the vehicle
- ✓ Proprietary in-house formulations cover -75°C to +89°C

OUR TEMPERATURE COVERAGE

FROZEN	-36°C to -10°C
Ice cream, frozen food, pharma	
CHILLED	-5°C to +8°C
Fresh produce, dairy, yogurt, meat	
CONTROLLED AMBIENT	+15°C to +25°C
Chocolates, vegetables, pharma	
THERMAL COMFORT	+29°C to +42°C
Solar thermal, battery thermal mgmt	

OUR SOLUTIONS

AND MANY MORE...

ONE PARTNER.

EVERY PART OF YOUR CHAIN.

01

Last Mile Delivery

- ✓ PCM pouches & satchets
- ✓ Insulated delivery bags (3L-100L)
- ✓ 2-wheeler & FOW compatible
- ✓ Maintains temp for 14+ hours

02

Mid Mile Transport

- ✓ Insulated boxes 25L-150L
- ✓ PCM panels: frozen & chilled
- ✓ For 3/4-wheelers & trucks
- ✓ Reduces CPU by ~25%

03

Cold Storage Solutions

- ✓ PCM panel lining for cold rooms
- ✓ 24-hour backup, power-free
- ✓ Blast freezer rental/purchase
- ✓ Reefer container rental

04

Cooling as a Service (CaaS)

- ✓ We freeze, deliver, collect & repeat
- ✓ Operational in 8 cities
- ✓ Zero capex on PCM logistics
- ✓ In-house CaaS also available

05

Ops Consulting & Advisory

- ✓ Route & duration analysis
- ✓ Right-sizing your solution
- ✓ SOP design for your team
- ✓ Cost reduction roadmap

DON'T TAKE OUR WORD FOR IT.

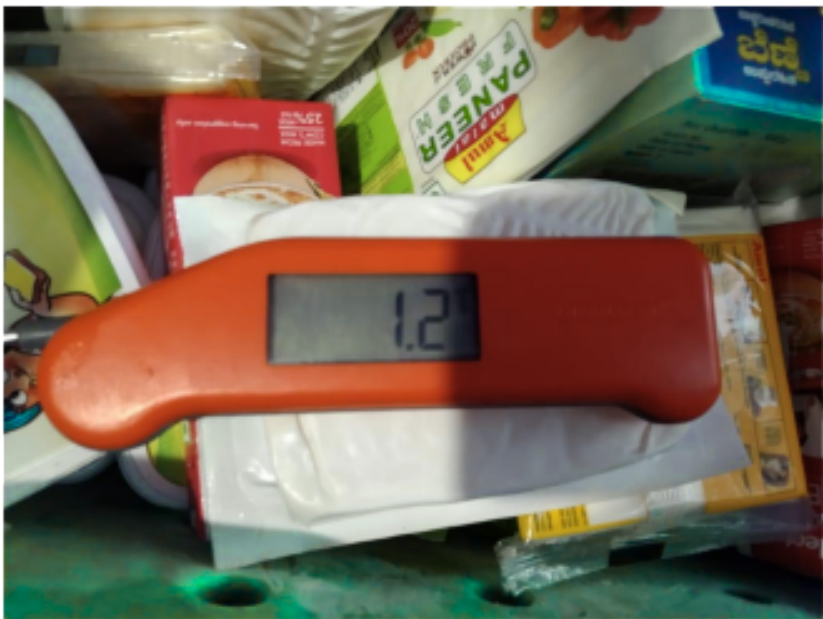

Here's what our solutions actually delivered with real numbers.

CHILLED PRODUCT TRANSPORTATION

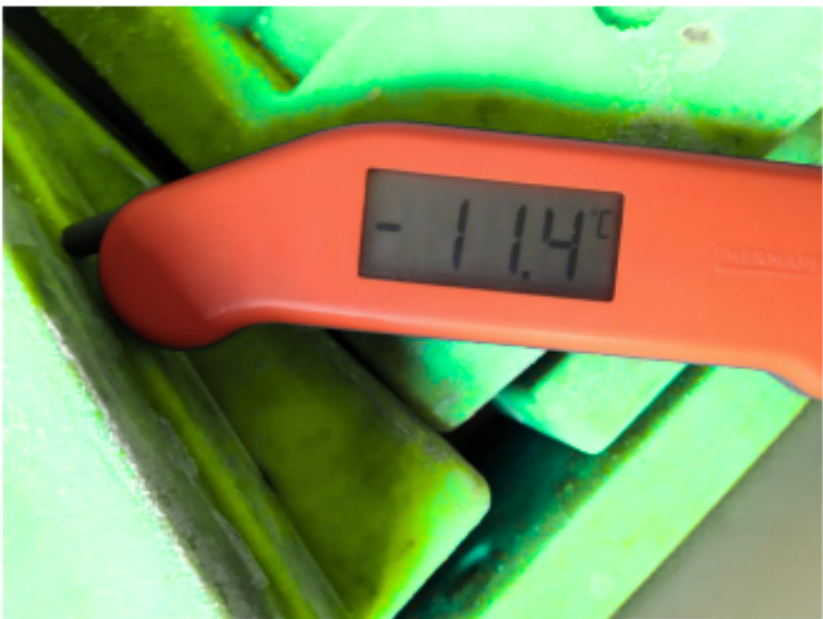

Trial Date	Product Category	Start time	End time	Start product temperature, °C	End product temperature, °C	Start panel temperature, °C	End PCM panel temperature, °C
Jan '23 to 6th Jan '23	Chilled	2:00 PM	6:00 AM	3.5	1.2	-11.4	-0.7

Start Chilled product temperature, °C

End Chilled product temperature, °C

Start Chilled PCM panel temperature, °C

End Chilled PCM panel temperature, °C

DON'T TAKE OUR WORD FOR IT.

Here's what our solutions actually delivered with real numbers.

FROZEN PRODUCT TRANSPORTATION

Trial Date	Product Category	Start time	End time	Start product temperature, °C	End product temperature, °C	Start panel temperature, °C	End PCM panel temperature, °C
5th Jan '23 to 6th Jan '23	Frozen	2:00 PM	6:00 AM	-12.8	-15.7	-26.4	-9

Start Frozen product temperature, °C

Start Frozen PCM panel temperature, °C

End Frozen product temperature, °C

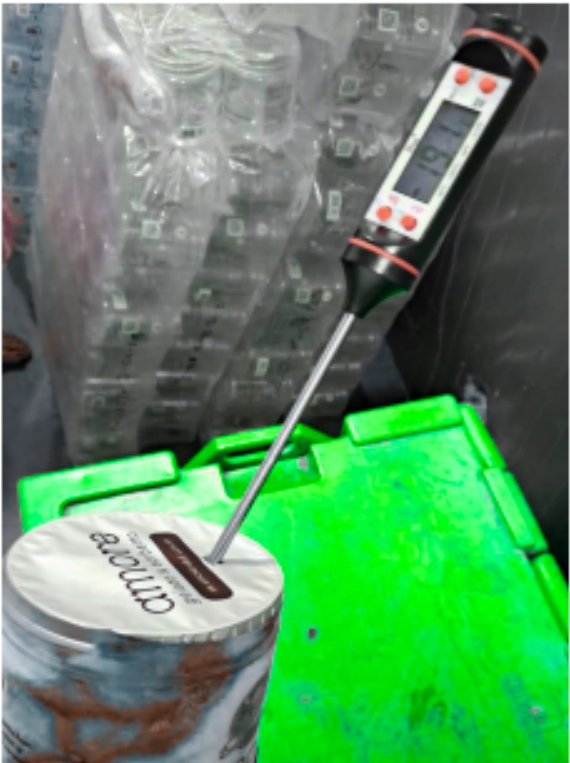

End Frozen PCM panel temperature, °C

DON'T TAKE OUR WORD FOR IT.

FROZEN ICE CREAM TRANSPORTATION

Trial Date	Product Category	Start time	End time	Start product temperature, °C	End product temperature, °C	Start panel temperature, °C	End PCM panel temperature, °C
3 rd June '23 to 4 th June '23	Frozen	12:00 PM	4:00 AM	-19.1	-18.8	-25.6	-20.8

Start Frozen product temperature, °C

Start Frozen PCM panel temperature, °C

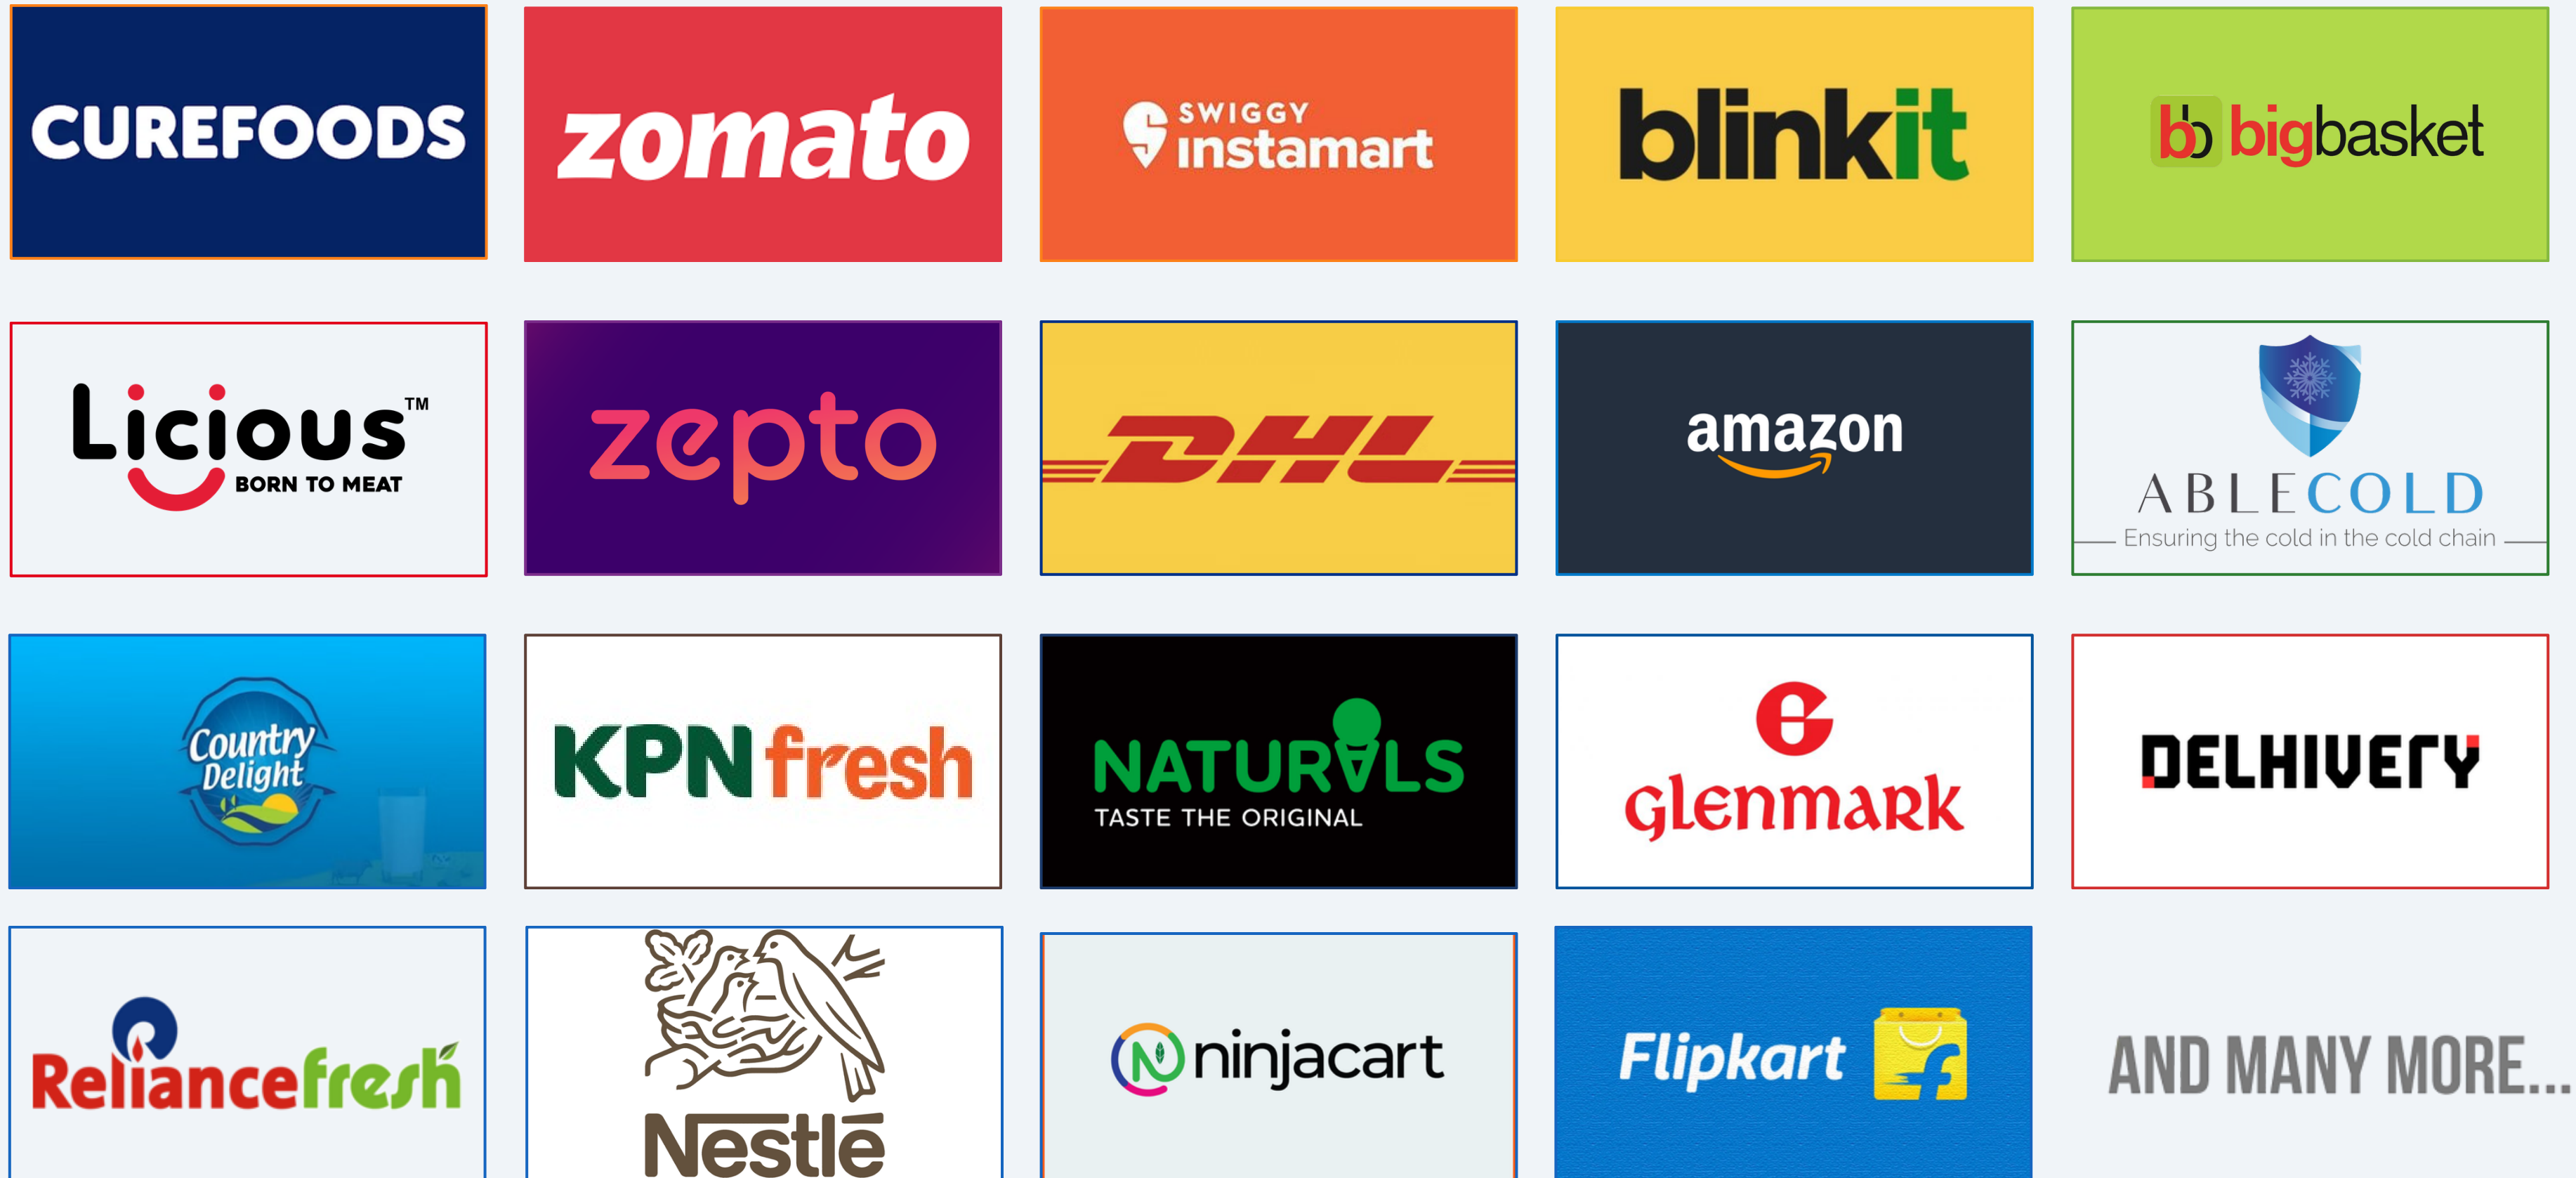

End Frozen product temperature, °C

End Frozen PCM panel temperature, °C

Companies That Trust Us

India's most demanding cold chain operators chose us. Here's why they stayed.

HOW WE WORK TOGETHER

No guesswork. No complicated onboarding. Just results.

1

Tell Us Your Problem

What are you transporting? Where? For how long? What temperature? We ask the right questions so you get the right solution, not the most expensive one.

2

We Prescribe The Exact Fit

Our team analyses your route, load, duration and ambient conditions. We recommend the precise PCM type, box size, and panel count. No over-engineering.

3

You Trial It Risk Free

Start with a pilot. See the temperature data. Measure the cost savings. Most clients expand within 30 days because the numbers speak for themselves.

4

We Scale With You

As your ops grow, we grow with you. CaaS means we handle the PCM logistics, you focus on your business. Full SOP support included.

Questions We Answer For You

- What temperature range do I need?
- How long is my transit window?
- What box or bag size fits my vehicle?
- How many PCM panels do I need?
- Do I need CaaS or in-house freezing?
- How much will I save vs reefer trucks?
- Can this solution scale pan-India?

Sustainability Isn't Our Tagline.

It's How We Were Built.

Our solutions directly contribute to 10 United Nations Sustainable Development Goals.

 Reusable PCM & Reducing Dry Ice Waste per delivery which helps you hit ESG targets, and cutting your total packaging cost.

**Your operations.
Our expertise.
One solution.**

Our team will map your operations,
recommend the right solution,
and have you running in days,
not months.

Let's Solve This Together

You've seen what we do. You know the problems we solve.
The only question is: how much longer will spoilage cost you?
